- Jeff found on the menu that pork chops is going to be offered for ten meals next week but he's not sure how much pork chops he should prepare. He decides to add view the current inventory and order more if needed.
1. Open Application
2. Press on a row in the inventory table
3. View information about purveyor, expected amount and nutrition.

Adding item to inventory
- Jeff hears from a lot of students that he should add shawarmas to the menu but he doesn't have the necessary meat to make them. While out in the kitchen he decides to add the meat to the inventory but doesn't want to go down to his office to input it onto his computer. Instead of having to add more sheets of paper to an already stuffed clipboard, he uses an app on a tablet instead.
1. Open Application
2. Press plus button in bottom right corner
3. Press add button that pops up
4. Fill out information in pop up dialog
5. Click done

Save items to reorder as CSV file
